AUBE '21

SUPDET 2021

AUBE '21 / SUPDET 2021 will definitely take place. The restrictions due to the COVID 19 pandemic will decide whether AUBE '21 / SUPDET 2021 will be either a hybrid event with both on-site and online presentations and discussions or an online-only event. If the COVID-19 pandemic (or your state of health) does not allow to enter Germany or to travel, a participation online is possible.

Registration for on-site and virtual attendance is possible from the beginning of June. Please, visit the conference website <http://nts.uni-due.de/aube/aube21/aube21.html>

Topics of the planned sessions are:

Aircraft & vehicles	Alarming	Applications	ASD
Gas sensors	Image processing	Oxy reduction	Sensors
Simulation / FDS	Smoke aerosol characterization	Special applications / Lithium batteries	Sprinkler & water / fire fighting
Standards / Standardisation	Statistics	Video detection	Wild fires

Presentations are given by authors from Australia, Canada, Czech Republic, P.R. China, Germany, United Kingdom, Ireland, Japan, Poland, Switzerland, The Netherlands, U.S.A.
